

Village of Pewamo Plants New Trees Thanks to  
Consumer Energy Grant

The Village of Pewamo is excited to announce the successful planting of 14 new trees. All trees were planted in the residential terrace – the area between the sidewalk and the road. This was made possible through a generous \$2800.00 grant from the Consumers Energy Community Street Boulevard Tree Planting Grant Program.

The initiative aligns the village long-term goal to “enhance amenities that positively affect residents’ quality of life and attract visitors.” By planting trees along residential streets, the village aims to increase green spaces, provide shade, and boost the aesthetic appeal for neighborhoods-ultimately creating a more welcoming environment for residents and visitors alike.

The village is grateful to Consumers Energy for this opportunity to add greenery to our community.
